

HOW TO SHEWEE

1

Undo trousers or pull down front of trousers. Push your underwear to one side and place Shewee securely against your body under the crotch, with the outlet pipe pointing away from the body and out of your clothing. No need for bare bottoms!

2

Aim to urinate in the most appropriate place available wherever you are & away from feet; either into a toilet, a suitable disposable container or discreetly behind a conveniently located tree!

3

When you have finished, pull the funnel away. The liquid repellent coating ensures no drips or splashes. You can also use the funnel to wipe off any drips if you don't have paper.

4

Place Shewee back into its resealable pouch for using again that day or for washing later. Shewee is hand or machine washable and at 7" long it fits easily into your pocket or handbag.
